Glazing Materials

metallic spacer between the glass panes that results in a higher energy performance, especially around the perimeter of the glass, giving it a “warmer edge.” We also utilize HB Fuller’s Thermo Seal® hot melt butyl, which has a very low MVTR and has been tested to exceed the performance requirements for CBA level under ASTM E773/E774.

Nail-on Fin

IWC uses a 1” nail-on fin that is pre-punched for easy installation. Fin set backs are available in 1 3/8” for use with power wall stucco systems and 1” for conventional three coat systems.

Options

Glass- Let your imagination be your guide with our multitude of glass possibilities. If you have a question, feel free to contact your architectural representative anytime. We’re here to help! Grids are available in flat and sculptured and may be used in a variety of designs.
