V-lite Glass

Sliding Glass Door

The Crown Series 5800 Sliding Glass Door offers homeowners a competitively priced alternative. These Sliding glass doors are offered in a wide variety of styles and sizes. This series is an energy efficient, low maintenance product that meets or exceeds today's strict energy requirements. All panels are glazed using 3/4" **INTERCEPT**[®] tempered safty glass. Crown Series doors are available in white or desert sand to complement your installation requirements.

Glazing Materials

Our insulating glass units are manufactured using PPG's patented INTERCEPT® warm edge technology. This process incorporates a thin metallic spacer between the glass panes that results in a higher energy performance, especially around the perimeter of the glass, giving it a "warmer edge." We also utilize HB Fuller's Thermo Seal® hot melt butyl, which has a very low MVTR and has been tested to exceed the performance requirements for CBA level under ASTM E773/E774.

Nail-on Fin

IWC uses a 1" nail-on fin that is pre-punched for easy installation. Fin set backs are available in 1 3/8" for use with power wall stucco systems and 1" for conventional three coat systems.

Weeping

IWC utilizes a weep door that allows moisture to escape and assures that wind and rain cannot be blown back into the door.

Vent Panels

Our vent panels have self tightening interlocks that lock with the fixed panel to create a tight seal against air and water.

Weatherstripping

IWC uses finseal woolpile weatherstrip around the full perimeter of the panels to ensure an unbroken seal against the weather.

Royal Technology™

All IWC windows feature only Royal Dura Technology™ premium extrusion. Royal Technologies is North America's leader in custom profile extrusion and has been an innovator in the profile extrusion industry since 1970. This attribute gives us the advantage by insuring that our products outperform in reliability and performance.
